PROFESSIONAL PROFILE

Economist and Data Scientist with dual academic training (Economics + Data Science & AI Engineering), specializing in the intersection of financial analysis, machine learning, and intelligent automation. Proven experience building end-to-end AI solutions: from predictive models in Python (scikit-learn, PyTorch, TensorFlow) to conversational agent architectures with LLMs, API integrations, and MCP (Model Context Protocol) for multi-agent systems. Core competencies in applied econometrics (ARIMA/GARCH time series, panel data, causal inference), MLOps (Docker, FastAPI, MLflow), and business intelligence (Power BI, advanced SQL). English level B2 — fully capable of collaborating in international remote teams.

KEY PROJECTS

MCP Multi-Agent Financial System

Multi-agent system using Model Context Protocol (MCP) for automated financial analysis. Agents communicate via standardized protocol to retrieve market data, compute risk indicators, and generate investment reports. Stack: Python, FastAPI, LLMs.

EDUCATION

Engineering en Data Science e Inteligencia Artificial — Universidad de Guayaquil

Economics — Universidad Técnica de Manabí
